

**Working Prototype Known Problems Report**  
**Lyfter**  
**Gainsville**  
**12/2/2018**

**List of functions not working correctly:**

1. When editing an existing workout and the user wants to change the workout time from PM to AM it does not allow the user to do so. It should allow the user to edit workouts to make them from PM to AM.
2. App will crash if the user is editing a workout that is the same day, start time, end time, and muscle group as another workout. If the user presses next when setting the time and then press back on the muscle group page and press next again and then try to add the workout, the app will crash.
3. User are able to add workout times that start anytime from 12am to 12:59am while there is another workout starting from 12am to 12:59am at same day.
4. Can't schedule a workout time starting from 11AM to passed 12AM (since it will have been the next day).
